

About waste separation & recycling here at Snickarbacken

From the 1st of November 2017 the following applies for waste separation and recycling at Snickarbacken.

Combustible trash and food waste can be disposed of in the green and brown bins in the garbage rooms adjacent to our entrances. Waste separation/recycling is available in the cold garage (ground floor).

Opening hours: 6–21 every day

Food waste

Food waste becomes bio gas and is sorted in brown paper bags. The bags are available for free in the hallway to our community house (Sidensvansvägen 63) and in the recycling room in the cold garage. Leave filled bags in the brown bins in the garbage rooms next to your entryway. The more of your food waste that is being sorted like this – the cheaper it is for us.

If you feel uncertain on what to sort as food waste, read more on www.sorteramatresten.se, and additional information is also printed on the brown paper bag.

Combustible trash

When you are sorting your trash the proper way, the only items that should remain are for example diapers, dishcloths and similar items. Everything else can be recycled.

Its our goal to reduce this type of garbage to a bare minimum, since it's not sorted and also means higher costs for us.

Plastic packaging

All plastic can be sorted here, including styrofoam. You do not have to rinse out plastic packaging.

Smaller electrical waste

The recycling room has a carriage to put smaller electrical waste in. Only items that fit in the carriage is acceptable to leave here. Larger items such as TV and washing machines you have to carry away yourself.

Light sources

Next to the carriage for smaller electrical waste there are bins for different kinds of light sources.

Metal

In this green bin you can leave your tins, lids, metal tubes or aluminum foil. Metal objects other than packaging should be left in the bins for bulky waste.

Batteries

Leave your batteries in the properly marked bin.

Colored glass/clear glass

It is possible to recycle both colored and clear glass in the recycling room. The bottles and cans should be empty and without corks or caps. Corks should be sorted as burnable, metal caps should be placed in metal.

Bulky waste

Do not leave building waste, garden waste, corrugated paper or electrical waste here. Only smaller items that fit in the bins. Other things you must take yourself to Hagbytippen.

Paper packaging (bins are outside)

Fold or flatten the packaging. Only paper, no plastic in these bins. Corrugated paper, paper bags and similar items can be left here.

Newspapers (bin outside)

Only leave newspapers, magazines, catalogs or loose papers here. No window envelopes!
